Hi John

I've attached the activity schedule, which I hope meets your requirements. We are meeting all the installation costs. It did come to considerably more than we anticipated but I have been given clearance to go ahead with all of the works.

What would be really fabulous is if the parish would consider taking ownership of all five of the shelters on our books instead of just the three we agreed? Its not a deal-breaker but would give weight to the case for spending the amount that we have allocated to this project. If you pop it on the agenda, you never know, they may agree.

Best regards

Subject Fw: Bus stop improvements - Woodmansey

Hi Debbie

That sounds great. Is there an agreed list of works that I could place before my Council for information.

Does this mean that all costs of the works, other than on-going electricity supplies, is being met by ERYC?

The Parish Council meets on Monday night.

Thanks

John Smith

Subject: Bus stop improveents

Hello John

I've been informed by John Attwood that a contractor has been chosen and is to commence works shortly. It looks as though we will be able to do everything we discussed.

Street Lighting are going to connect the electricity supply to the shelters when all other works are completed and will be the only ones allowed to maintain and repair the lights and connections. The parish will be responsible for the cost of the electricity and charges for repairs and you will sign an agreement with Street Lighting to that effect. I believe you said you already have a similar arrangement in place so you probably have a better idea of how this will work than I do.

I appreciate that this is all a bit sudden but it is imperative that the budget is allocated before the end of March, otherwise we may lose the funding and the job will be shelved indefinitely. The new shelters will be by Queensbury and are the domed top three bays, like the existing ones but these will all be enclosed.

Best regards
